

IPV WealthX

13 December (Virtual Edition)

IPV WealthX is a high-insight, high-impact virtual masterclass designed to bring India's most respected wealth creators and angel investing pioneers onto a single platform. This exclusive edition aims to decode the *unspoken truths* of wealth creation—shared directly by legends who have built transformational companies, backed breakthrough founders, and shaped India's investment landscape.

The session features a powerful fireside conversation with **Sanjeev Bikhchandani**, one of India's most iconic entrepreneurs, in dialogue with **Ankur Mittal** or **Vinay Bansal** from Inflection Point Ventures. Attendees will gain clarity on founder evaluation, conviction building, sectoral timing, risk navigation, and long-term wealth compounding—insights rarely shared on public platforms.

The masterclass begins with a sharp 30-minute session by **IPV's leadership**, outlining the evolution of angel investing, IPV's investment frameworks, and breakthrough portfolio journeys. A moderated opening segment will align the audience on expectations and prepare them for the deep-dive. The event concludes with a live Q&A, offering participants direct access to the speakers.

Designed to deliver value in its purest form, **IPV WealthX** offers practical strategies, untold stories, and frameworks that investors cannot find on any podcast or article—making it a must-attend for aspirants seeking to build meaningful wealth through early-stage investments.
